# Cities within Cities

## Negotiating Cultural Density

**How can we re-imagine ordinary neighbourhoods through strategically engaging and intensifying their creative potential, embracing their identity through their traditions, rituals, new temporary art and cultural events?**

Students are introduced to design methods and tools for neighbourhood design through cultural co-production, festivals, exhibitions, celebrations, and case-studies from the Urban-Lecture Series.

Strategic concepts respond to, negotiate and link productive collisions with diverse processes and factors that shape densification of city blocks and streetscapes. Considering day-light, programming and imagining growth processes, small scale neighbourhoods are transformed into legitimate districts, towns and *Cities within Cities*.
